

**North Coast Salmon Update #7 – 19 August 2025***Please note that catch numbers and estimates are preliminary and are subject to review.*

The 2025/26 Northern Salmon IFMP can be found at: [2025/2026 Northern Salmon IFMP](#) .

North Coast Troll

The Area F Chinook Salmon ITQ full fleet opening (FN0744) and the Haida Community Based Chinook opening (FN0806) started on August 16th. There are currently 88 vessels participating in the main opening, which includes portions of PFMA 1, 101, 2W and 142. An additional 10 vessels are also designated under the Haida CBF troll licence including 3 full sized trollers and 7 smaller restricted gear vessels.

Retention of Coho and Pink salmon is permitted in this opening and dockside validation of all Chinook landings is mandatory. Dual fishing for FSC is also permitted for designated participants in the Haida CBF opening. Area F Chinook and Coho catches are sampled for CWT recovery and DNA is collected from Chinook and Coho for GSI analysis.

Weekly estimates of effort, catch and releases for the northern troll fishery to August 18th are summarized in Table 1.

Table 1. Area F Troll – 2025 Estimated weekly catch and release by species

Note: Catch estimates are preliminary and subject to revision.

NC (North Coast) Recreational Chinook Management Plan

The following measures are in place:

Areas 1, 2, 142, and that portion of Area 101 west of 131 degrees 40.0 minutes West longitude:

- May 29, 2025 until July 31, 2025 - one (1) Chinook per day.
- August 1, 2025, to March 31, 2026 - two (2) Chinook per day.

Terminal Salmon Assessments:

The Haida Fisheries Program is operating the Yakoun River ARIS sonar installation again in 2025 to estimate Sockeye and Chinook salmon escapements. The Tlell Watershed Society's installation of the Tlell River counting fence for video-based monitoring of Coho and Pink salmon escapement has been delayed by high stream flows until early next week.

Terminal salmon assessments by vessel-based Charter are expected to start in early September and since it is not a dominant cycle Pink Salmon year (even years on Haida Gwaii) efforts will focus primarily on assessing Chum salmon abundance. In addition, the Haida Fisheries Program will carry out assessments of key watersheds in Skidegate Inlet, Masset Inlet, Naden Harbour and Rennell Sound.

Area 3 - Nass River

The Nass River fishwheels have been operating since June 1, 2025. In-season run size estimates past the Nass fishwheels are shown in Table 3. The current in-season Sockeye Total Return to Canada (TRTC) forecast is from 387k to 447k (95% confidence intervals) with a point estimate of 417k. The current in-season Chinook TRTC forecast is from 17k to 18k (95% confidence intervals) with a point estimate of 18k.

Table 3. Nass fishwheel in-season run size estimate to date on August 17, 2025, and historical average run size (1994-2024) to date.

Year	Sockeye	Chinook	Coho	Steelhead
2025	324,850	10,377	22,984	4,345
1994-2024 Avg.	284,800	17,910	47,100	5,760

*Data from Nisga'a Lisims Government Fisheries and Wildlife Department.

Water levels at the Gitwinksihlkw Fishwheels on August 17, 2025, were 1.27m as compared to the mean water levels from 1994-2024 of 1.23m. Water temperatures of 17.5°C are warmer than the 1994-2024 average of 16.8°C.

Nass River salmon stock assessment updates from the Nisga'a Fish and Wildlife Department will be available here:

<https://www.dropbox.com/scl/fo/ahrrza0aplzcnamatapar/h?dl=0&rlkey=n51s6qgu0yze0vrphue8dk4ap>.

Net Fisheries:

For the 2025 fishing season, there have been fourteen seine openings and four gill net openings in Area 3 to date. Preliminary catch information is provided below.

CSAF Demonstration Fisheries:

Two CSAF Demonstration fisheries targeting Nass River Sockeye have been included in the 2025 IFMP. The fishery proponents, Nisga'a Lisims Government (NLG) and Gitanyow First Nation, have a combined access to 20.83% of the Canadian Commercial Total Allowable Catch for the Nass. Gitanyow First Nation has implemented their Meziadin River Demonstration fishery July 27 to date, with harvest data provided following.

Table 6. Preliminary harvest to date for Nass River Demonstration Fisheries in 2025.

Proponent	Commercial Share	Total Sockeye (pieces)
Gitanyow Fisheries Authority	8.760%	5070

Two marine CSAF Demonstration fisheries targeting Area 3 Pink salmon were also included in the 2025 IFMP. North Coast Skeena First Nations Stewardship Society (NCSFNSS), Lax Kw'alaams Band and Metlakatla First Nation have access to 17.08% of harvestable surplus for Area 3 Pink salmon, based on the Area 3 commercial seine harvest. Openings occurred on July 15-16 with Sockeye and Chum retention, August 1-3 with Sockeye retention permitted, and August 9-10 with no bycatch retention. The fishery is now closed for the balance of the season with harvest data provided following:

*Table 7. Preliminary harvest to date for Area 3 Demonstration Fisheries in 2025.*

Proponent	Commercial Share	Catch to Date		
		Pink (pieces)	Chum (pieces)	Sockeye (pieces)
Coast Tsimshian (<i>Lax Kw'alaams, Metlakatla</i>)	5.693%	29,515	2193	2676
NCSFNSS (<i>Gitxaala, Gitga'at, Kitsumkalum, Kitselas</i>)	11.387%	87,402	3020	2986

As occurred in 2023 and 2024, an ESSR fishing plan that targets the harvestable surplus of Meziadin Sockeye has been approved for implementation by Gitanyow First Nation. Nisga'a Lisims Government has also provided an ESSR proposal that is undergoing evaluation.

Demonstration and ESSR fisheries are subject to annual approval of the respective fishing plans.

Meziadin Fishway:

The Meziadin Fishway operations began on July 1, 2025. A total of 102,528 sockeye salmon have been counted at the fishway as of August 18 (Table 8). Water levels were 1.27m at the Fishway on August 4, 2025, compared to the average of 1.23m from 1998-2024. Water temperature of 14.5°C is below the 1999-2024 average of 16.6°C.

Table 8. Cumulative Meziadin fishway counts to August 18 and historical mean cumulative adult count to date.

Year	Sockeye	Chinook	Coho	Steelhead
2025	102,528	29	56	-
1994-2024 Avg.	119,934	199	91	-

Historic and 2025 counts will be available here: <http://www.pac.dfo-mpo.gc.ca/fm-gp/northcoast-cotenord/meziadin-eng.html>

Recreational Fisheries:

NC Recreational Chinook Management Plan

The following measures are in place:

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2025 at 00:01 hours to June 22, 2025 – One (1) Chinook per day.
- Effective June 23, 2025 to July 23, 2025 - Zero (0) Chinook per day.
- Effective July 24, 2025 to August 17, 2025 - One (1) Chinook per day.
- Effective August 18, 2025 to March 31, 2026 - two (2) Chinook per day.

Nass River watershed started closed to recreational Chinook retention.

Nass Chinook Recreational Management Plan

The following measures under FN0653 were put into place for the tidal portion of Gingolx River and some subareas of PFMA 3 to address ongoing concerns for Nass Chinook:

- July 24, 2025 to August 8, 2025: Chinook daily quota zero (0) per day in Subareas 3-12 and 3-18
- August 9, 2025 to August 17, 2025: Chinook daily quota one (1) per day in Subareas 3-12 and 3-18
- August 18, 2025 to March 31, 2025: Chinook daily quota two (2) per day in Subareas 3-12 and 3-18
- Chinook daily quota zero (0) per day in the Tidal Waters of the Gingolx (Kincolith) River during the period of July 24, 2025 to March 31, 2026.

Kwinageese Weir:

The Kwinageese Weir, operated by the Nisga'a Fish and Wildlife Department, started on July 11, 2025 and is scheduled to operate to October 10, 2025. As of August 17, 2025 total of 414 Chinook, 824 sockeye, 51 coho, and 4 steelhead have been counted upstream. Current water level is 0.35m as compared to the mean of 0.20m (2002-2024) and water temperature is 17.7°C.

Alaska Fisheries:

District 101 Gillnet Fishery:

The District 101 (D1) gillnet fishery opened for four days from August 10 through August 14. Catch and effort information is available below (Table 9). The D1 gillnet fishery opened again for four days from August 17 through August 19; preliminary catch information from that fishery will be available in the next update.

Table 9. Alaska District 101 gillnet harvest and effort (CPUE) for stat week 33 in 2025 and the 10-year average.

Species	District 101 Catch – Week 33 (CPUE)	10-Year Average (CPUE)
Chinook	0	27
Sockeye	1,500 (18)	2,062 (16)
Coho	1,500 (18)	1,478 (12)
Pink	12,000 (138)	35,292 (231)
Chum	14,000 (160)	18,791 (105)
Effort (boats)	15	35
Fishing Days	4	5

District 104 Seine Fishery:

The District 104 (D4) purse seine fishery opened on August 12 and again on August 16 through August 17. Catches from these fisheries are included in Table 10 below. The fishery will open again on August 21; catches from that fishery will be included in future updates.

Table 10. Alaska District 104 purse seine harvest by opening for stat week 33 in 2025.

	Chinook	Sockeye	Coho	Pink	Chum	Boats	Hours
Aug 12	-	4,800	2,100	175,000	6,800	21	15
Aug 16-17	-	4,500	1,200	157,000	6,100	20	39
Total SW 33	-	9,300	3,300	332,000	12,900		54

More information on Southeast Alaskan fisheries is available here:

<http://www.adfg.alaska.gov/index.cfm?adfg=fishing.main>

Area 4 - Skeena River

As of August 18, 2025, the estimated Total Return to Canada (TRTC) ranges from 1.33– 2.21 million Sockeye with a point estimate of 1.72 million (Table 11, Figure 1).

Table 11. 2025 in-season run size estimate probability for Skeena Sockeye as of August 18, 2025.

Species	Stock	Escapement Target	TRTC	2025 In-season Run Size Estimate Probability				
				10%	25%	50%	75%	90%
Sockeye	Skeena	1,050,000	Mean			1,720,976		
			Median	2,211,235	1,972,023	1,726,775	1,512,109	1,338,885

Figure 1. Total return to Canada run size probability distribution to August 18, 2025. Shaded areas indicate 80% CI.

Net Fisheries:

Area C:

For the 2025 season, there have been twelve gill net openings to August 8, 2025. Preliminary catch information is provided below.

CSAF Demonstration and Excess to Salmon Spawning Requirements (ESSR) Fisheries:

Four CSAF Demonstration fisheries targeting Skeena Sockeye were previously approved, with two new fisheries included in the 2025 IFMP. North Coast Skeena First Nations Stewardship Society (NCSFNSS), Kitsumkalum Band, Kitselas First Nation, Metlakatla First Nation, Lax Kw'alaams Band, Gitxsan First Nation, and Lake Babine Nation fisheries represent access to 20.83% of the Canadian Commercial Allowable Catch, further divided by geographic area and proponent.

Openings for the three Area 4 marine Demonstration fisheries, implemented by NCSFNSS, Metlakatla First Nation, and Lax Kw'alaams Band, were provided July 9-10, 19-20, 26-27, and August 6-7. The fishery is closed for the balance of the season with cumulative harvest information provided in the table below. "Type B" Dual Fishing, or the retention of non-target species for FSC purposes, was applicable to Area 4 opportunities with an aggregate reporting of retention provided at Post Season Review.

*Table 14. Preliminary harvest to date for Area 4 Demonstration Fisheries in 2025.*

Proponent	Commercial Share	Total Harvest (# Sockeye)
Lax Kw'alaams Band	1.157%	1117
Metlakatla First Nation	1.157%	1959
NCSFNSS (Gitxaala, Gitga'at)	2.314%	5474

In the Lower Skeena, openings for the Kitselas First Nation Demonstration fishery were provided between July 17 and August 13. No commercial harvest transpired. The Kitsumkalum Sockeye Demonstration fishery was also provided openings between July 18 and August 11, with preliminary harvest data available in Table 15. Both Lower Skeena fisheries are now closed for the balance of the season.

Mid-river, the Gitksan Watershed Authorities Demonstration fishery was implemented August 1 and continues to date. Preliminary harvest information is provided below.

In the Upper Skeena, Lake Babine Nation has commenced terminal Demonstration efforts as of August 16 in Babine Lake. Catch information will be provided as it becomes available.

Table 15. Preliminary harvest to date for Skeena River Demonstration Fisheries in 2025.

Proponent	Commercial Share	Total Harvest (# Sockeye)
Kitsumkalum First Nation	1.157%	1911
Kitselas First Nation	1.157%	0
Gitksan Watershed Authorities	6.943%	3324
Lake Babine Nation	6.943%	-

Three ESSRs in the Skeena River watershed were included in the 2025 IFMP: Babine Jack Sockeye (Lake Babine Nation), Babine Large Sockeye (Lake Babine Nation), and Bulkley River Pink salmon (Wet'suwet'en Treaty Office Society). The Kitwanga Pink ESSR fishery, which has occurred historically, has seen renewed interest from Gitanyow First Nation with the intention to revisit trigger mechanisms. The Bulkley River (Witset Canyon) Pink ESSR commenced July 30 and continues to date. Preliminary catch information is provided, current to August 13:

Table 16. Preliminary harvest to date for North Coast ESSR Fisheries in 2025.

Proponent	Location	Total Harvest
Wet'suwet'en Treaty Office Society	Witset Canyon	629 Pinks

Implementation of CSAF Demonstration fisheries and ESSRs is subject to approval of the respective fishing plans.

Recreational Fisheries:

Area 3 and 4 Creel Survey

May Summary

The North Coast Skeena First Nations Stewardship Society began their creel survey operations in May of 2025. They performed 301 interviews totalling 891 anglers, with a reported catch of 424 Chinook and 9 Coho. These numbers are expanded and produce a catch estimate of 1,105 Chinook and 23 Coho for the month of May.

June Summary

In June of 2025 they performed 629 interviews totalling 1,964 anglers, with a reported catch of 629 Chinook, 157 Coho, and 20 Pink. These numbers are expanded and produce a catch estimate of 1,951 Chinook, 865 Coho, and 208 Pink for the month of June.

July Summary

In July of 2025 they performed 1096 interviews totalling 3,760 anglers, with a reported catch of 284 Chinook, 5,728 Coho, 541 Pink, 4 Sockeye and 1 Chum. These numbers are expanded and produce a catch estimate of 1,171 Chinook, 22,094 Coho, 2,198 Pink, 17 Sockeye and 4 Chum for the month of July.

NC Recreational Chinook Management Plan

The following measures are in place:

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2025 at 00:01 hours to June 22, 2025 – One (1) Chinook per day.
- Effective June 23, 2025 to July 23, 2025 - Zero (0) Chinook per day.
- Effective July 24, 2025 to August 17, 2025 - One (1) Chinook per day.
- Effective August 18, 2025 to March 31, 2026 - two (2) Chinook per day.

The Skeena River watershed started closed to recreational Chinook retention.

Skeena River Watershed Recreational Fishery:

Portions of the Skeena River watershed are open for recreational harvest of two (2) Sockeye per day.

Tyee Test Fishery:

The test fishery began operation on June 10, 2025. As of August 18, the estimated number of large Sockeye past Tyee is 1,441,534.

Table 17. Tyee test fishery cumulative index to date August 18, 2025 and ten-year average (2014-2024) to date.

Year	Sockeye	Coho	Pink (odd)	Chum	Lg. Chinook	Steelhead
2025	998.63	23.44	1312.39	20.29	116.43	38.11
2024	1304.98	28.64	-	12.83	64.01	123.33
2023	1169.56	80	954.21	35.81	91.05	27.53
2022	2729.37	37.88	-	25.35	150.04	54.83
2021	719.14	35.07	352.53	5.67	75.9	19.23
2015-2024 Average	1161.80	37.32	321.79	25.04	94.69	77.48

The 2025 Tyee test fishery daily and cumulative Sockeye escapement estimate data, along with 2025 daily and cumulative escapement indices by species, are available here:

<http://www.pac.dfo-mpo.gc.ca/fm-gp/northcoast-cotenord/skeenatyee-eng.html>

Babine Fence:

The Babine Fence began operations on July 9 this year. As of August 18, 2025 a total of 653,339 large sockeye have been counted (Table 18). The water level and temperature on August 18 are approximately 0.60m and 16.5°C, respectively.

Table 18. Cumulative Babine Fence counts to August 18.

Year	Sockeye (large)	Sockeye (jack)	Chinook (large)	Chinook (jack)	Coho	Pink	Steelhead
2025	653,339	12,819	212	409	93	45,368	21

Historic and 2025 counts will be available here:

<https://www.pac.dfo-mpo.gc.ca/fm-gp/northcoast-cotenord/babine-eng.html>

Kitwanga Weir:

The lower Kitwanga River Adult Salmon Enumeration Facility (KSEF) was fully operational on July 11. Updates provided by the Gitanyow Fisheries Authority are available here:

www.gitanyowfisheries.com

Sustut Weir:

The Province of BC will be operating the Sustut Weir this year. It is expected to be operational by August. Information will be included when it is available.

Area 6

Net Fisheries:

Area A:

There have been two seine net openings to date. Preliminary catch information is provided below.

CSAF Demonstration Fisheries:

One previously approved CSAF Demonstration fishery targeting Area 6 Pinks was included in the 2025 IFMP with implementation pending through Gitga'at First Nation.

Recreational Fisheries

Area 6 Creel Survey

Information will be provided once the Department receives it.

Areas 7 to 10 - Central Coast

Resource Management assessment overflights are ongoing in the Central Coast, and Charter Patrol operations are fully active in Areas 7 and 8.

In Area 7, a strong presence of Pinks has been observed, but in river assessment efforts were hampered over the weekend due to rising water conditions, and Chum abundance remains low at this time. In-stream Chum inspections in Bella Coola are ongoing with reports indicating that peak spawning has now passed

The Atnarko River Chinook mark and recapture began last week.

Snootli Hatchery has completed its egg-take operations on Snootli and Saloompt creeks.

Recreational Fisheries:

Data will be provided when available later in the season.

The Heiltsuk, Kitasoo/Xai'xais, Nuxalk, and Wuikinuxv Nations, under the direction of the Central Coast Indigenous Resource Alliance (CCIRA) continue to collect data through a creel survey and over-flight program. The program will assess recreational and First Nations' Food, Social, and Ceremonial (FSC) fisheries in marine portions of Areas 6 to 9, and in the Bella Coola River system within freshwater Region 5B Survey. Survey work will occur through September 2025. Recreational and Indigenous fishers should be aware that they may be approached by creel surveyors from the Nations to collect important data from these fisheries.
