

North Coast Salmon Update #1 – 30 June 2026

Please note that catch numbers and estimates are preliminary and are subject to review.

A link to the final 2026/27 Northern Salmon IFMP will be provided when available.

North Coast Troll

Coho and Pink Salmon

The Area F troll, A-B Line (North Dixon Entrance), Pink Salmon directed opening ([FN0589](#)) is scheduled to start on July 1st with retention of Coho and Sockeye salmon permitted. Northern Sockeye bycatch provisions are in effect, allowing retention of Sockeye east of 133 degrees W longitude. This Pink directed opening is typically a low participation fishery with less than 30 vessels participating.

Due to ongoing concerns and continuing uncertainty regarding North Coast Coho abundance and productivity the Area F full fleet directed mixed stock Coho fishery and Central Coast Limited Coho Demonstration fishery will remain closed again in 2026.

Areas 1 & 2 - Haida Gwaii

Recreational:

There are five major fly-in lodges operating on Haida Gwaii in 2026, including four in Area 1 and one in Area 2W. These major operations typically account for over 80% of the recreational catch in Areas 1 and 2.

Area 1 and 2 recreational catch estimates are derived from two sources. The five major lodges participate in the DFO Logbook Catch Reporting program providing effort and catch data on a monthly basis. Also, the Haida Fisheries creel monitoring program, which started in early June, provides additional monitoring of effort, catch and releases (Chinook and Coho) for the Area 1 lodges as well as independent anglers fishing out of local communities. This includes residents of Haida Gwaii and visiting independent anglers as well as guided anglers staying at several smaller community-based lodges. Creel estimates for June will be reported in the next weekly update.

North Coast Chinook Management Plan-AABM Recreational Fisheries

Areas 1, 2, 142, and that portion of Area 101 west of 131 degrees 40.0 minutes West longitude:

- May 29, 2026 to July 31, 2026 - one (1) Chinook per day.
- August 1, 2026 to March 31, 2027 - two (2) Chinook per day.

**Area 3 - Nass River**

The Nass River Gitwinksihlkw fish wheels have been operating since June 1. In-season run size estimates past the Nass fishwheels are shown in Table 1. Updated In-season forecast estimates for the total return to Canada (TRTC) are not yet available and will be provided by Nisga'a Fisheries and Wildlife Department.

Table 1. Nass fishwheel in-season run size estimate to June 29, 2026, and historical average cumulative catch (1994-2025) to date.

Year	Sockeye	Chinook	Coho	Steelhead
2026	48,451	2,588	-	N/A
1994-2025 Avg.	52,700	8,870	-	N/A

Data provided by Nisga'a Lisims Government Fisheries and Wildlife Department. N/A means data not available at time of publishing.

Nass River salmon stock assessment updates from the Nisga'a Fish and Wildlife Department will be available for future weekly updates.

Nisga'a Fisheries:

Nisga'a Nation cumulative domestic (FSC) and total catch summary for Nass salmon and steelhead was not available for this update. Available information will be included in the next update.

Net Fisheries:*Area C:*

The Area 3 gill net fishery is scheduled to open July 6 and 7, 2026 ([FN0644](#)). Catch data will be provided in the next weekly update.

Area A:

The Area 3 seine fishery is scheduled to open July 7 and July 8, 2026. (). Catch data will be provided in the next weekly update.

CSAF Demonstration and Excess to Salmon Spawning Requirements (ESSR) Fisheries:

Two CSAF Demonstration fisheries targeting Nass Sockeye have been included in the 2026 draft IFMP. The fishery proponents, the Nisga'a Lisims Government and Gitanyow First Nation, have a combined access to 22.75% of the Canadian Commercial Total Allowable Catch for the Nass.

A separate two CSAF Demonstration fisheries targeting Area 3 Pink salmon were also included in the 2026 draft IFMP. North Coast Skeena First Nations Stewardship Society (NCSFNSS), Lax Kw'alaams Band and Metlakatla First Nation have indicated an interest in implementing these fisheries to access 18.63% of harvestable surplus for Area 3 Pink salmon, based on the Area 3 commercial seine harvest.

As occurred in 2023 and 2024, ESSR fishing plans that target the harvestable surplus of Meziadin Sockeye are undergoing evaluation for potential implementation in 2026.

Implementation of Demonstration and ESSR fisheries is subject to approval of the respective fishing plans.

Recreational Fisheries:

Non-Tidal

Recreational fishing for Chinook is closed in the Nass River watershed.

North Coast Chinook Management Plan-ISBM Tidal Recreational Fisheries

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2026 at 00:01 hours to 23:59 hours June 22, 2026 - One (1) Chinook per day.
- Effective June 23, 2026 until further notice - Zero (0) Chinook per day.

Tidal portion of the Gingolx (Kincolith) River:

- Effective June 23, 2026 until further Notice - Zero (0) Chinook per day.

Meziadin Fishway:

Operations will commence in July. Information will be included in future updates as it becomes available.

Historic and 2026 counts will be available through:

<http://www.pac.dfo-mpo.gc.ca/fm-gp/northcoast-cotenord/meziadin-eng.html>

Kwinageese Weir:

Kwinageese Weir information will be included in future updates as it becomes available.

**Alaska Fisheries****District 101 Gillnet Fishery:**

The District 101 (D1) gillnet fishery opened for four days from June 21 through June 25. Catch and effort information is available below (Table 4). The D1 gillnet fishery will open again for four days from July 6 through July 10. Catch information from that fishery will be available in the next update.

Table 4. Alaska District 101 gillnet harvest and effort (CPUE) for stat week 26 in 2026 and the 10-year average.

Species	District 1 Catch – Week 26 (CPUE)	10-Year Average (CPUE)
Chinook	200	390
Sockeye	5,000 (50)	2,150 (16)
Coho	50	250
Pink	0	1,000
Chum	30,000 (300)	20,600 (157)
Effort (boats)	25	33
Fishing Days	4	4

District 104 Seine Fishery:

The District 104 (D4) purse seine fishery will open on Sunday July 5. Information from that fishery will be included in the next update.

More information on Southeast Alaskan fisheries is available here:

<http://www.adfg.alaska.gov/index.cfm?adfg=fishing.main>

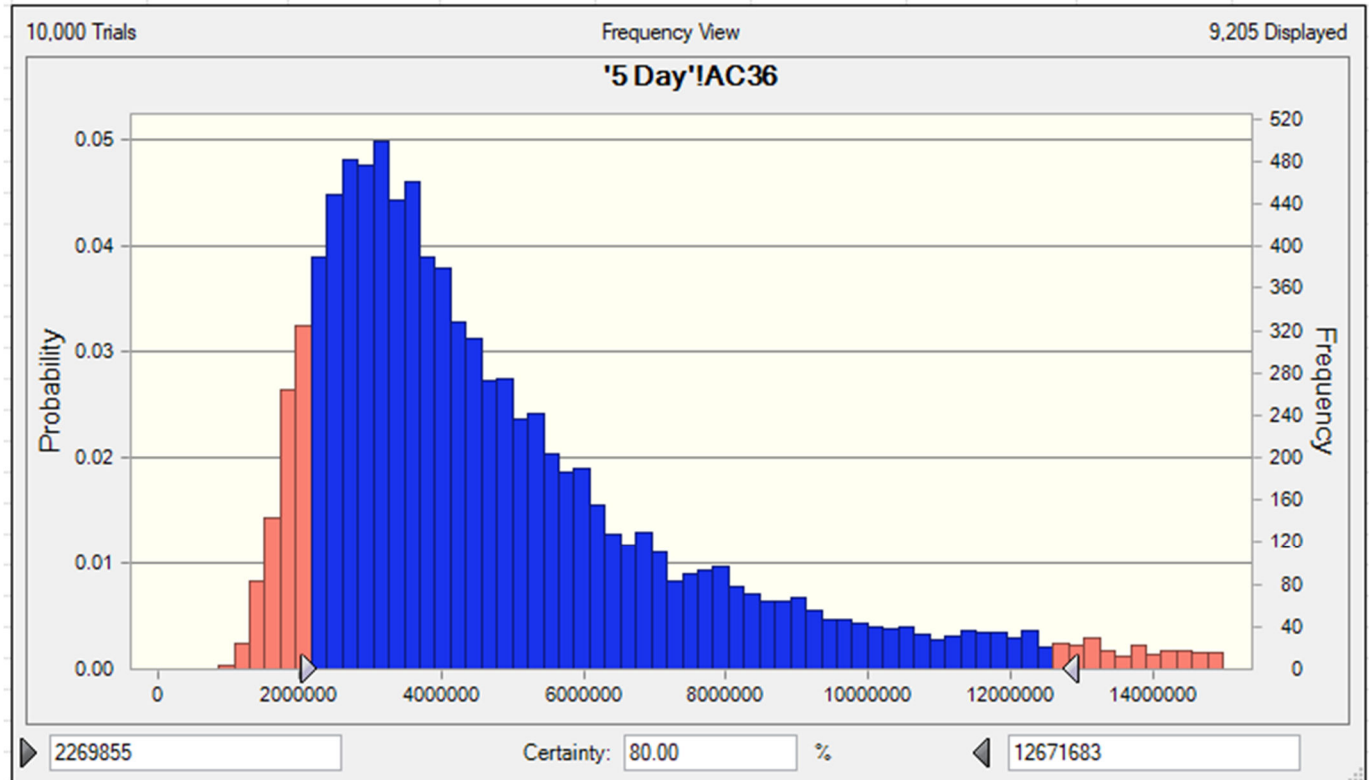

Area 4 - Skeena River

Based on results from the Tyee test fishery to June 29, the current run size estimates range from 2.27 M-12.67 M Skeena sockeye (80% certainty), with a mean (point) estimate of 4.435 M (Table 5, Figure 1).

Table 5. 2026 in-season run size estimate probability for Skeena Sockeye as of June 29, 2026.

2026 Inseason TRTC									
to June 29					2026 Inseason Run Size Estimate Prob. (TRTC)				
Species	Stock	Escape. Target 1,050,000	TRTC	Median					
				10%	25%	50%	75%	90%	
				Mean					
Sockeye	Skeena		Median	12,671,683	6,953,745	4,251,535	2,968,705	2,269,855	

TRTC run size probability distribution to June 29, 2026. Shaded areas indicate 80% CI.

Figure 1. Total return to Canada run size probability distribution to June 29 2026. Shaded areas indicate 80% CI.

Net Fisheries:

Area C:

No Area C fisheries have occurred in Area 4 to date this season.

CSAF Demonstration and Excess to Salmon Spawning Requirements (ESSR) Fisheries:

Seven CSAF Demonstration fisheries targeting Skeena Sockeye were included in the 2026 draft IFMP. North Coast Skeena First Nations Stewardship Society (NCSFNSS), Kitsumkalum Band, Kitselas First Nation, Metlakatla First Nation, Lax Kw'alaams Band, Gitksan First Nation, and Lake Babine Nation fisheries represent access to 22.75% of the Canadian Commercial Allowable Catch, further divided by geographic access and proponent.

An initial opening for the three Area 4 marine Demonstration fisheries will be informed by observed in-season abundance estimates and available commercial TAC and will be announced via fisheries notice.

Two ESSRs in the Skeena River watershed were included in the 2026 draft IFMP: Babine Sockeye (Lake Babine Nation) and Bulkley River Pink salmon (Office of the Wet'suwet'en).

Implementation of CSAF Demonstration fisheries and ESSRs is subject to approval of the respective fishing plans.

Recreational Fisheries:

Area 3 and 4 Creel Survey

May Summary

The North Coast Skeena First Nations Stewardship Society began their creel survey operations in May of 2026. They performed 353 interviews totalling 1,086 anglers with a reported catch of 655 Chinook and 8 Coho. These numbers are expanded to produce a catch (kept) estimate of 2,115 Chinook and 41 Coho.

In May of 2025 they performed 301 interviews totalling 891 anglers with a reported catch of 424 Chinook and 9 Coho. These numbers are expanded and produce a catch estimate of 1,105 Chinook and 23 Coho for the month of May.

Non-Tidal

Recreational fishing for Chinook is closed in the Skeena River watershed and all rivers and lakes flowing into PFMA 3 to 6, excluding the Kitimat River.

North Coast Chinook Management Plan-ISBM Tidal Recreational Fisheries

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2026 at 00:01 hours to 23:59 hours June 22, 2026 - One (1) Chinook per day.
- Effective June 23, 2026 until further notice - Zero (0) Chinook per day.

Tidal portion of the Gingolx (Kincolith) River:

- Effective June 23, 2026 until further Notice - Zero (0) Chinook per day.

**Tyee Test Fishery:**

The test fishery began operation on June 10, 2026. As of June 29, the estimated number of large Sockeye past Tyee is 151,177. Using average run timing (1985-2025), it is estimated that 3.48% of the run has passed Tyee as of this date.

Table 6. Tyee test fishery cumulative index to date June 29, 2026 and ten-year average (2016-2025) to date.

Year	Sockeye	Coho	Pink (even)	Chum	Lg. Chinook	Steelhead
2026	101.41	0	0	0	29.46	0.82
2025	38.49	0	-	0	29.03	0
2024	25.34	0	0	0	14.81	0.24
2023	50.01	0	-	0	40.14	0
2022	49.03	0	0	0	40.76	0
2016-2025 Average	22.37	0.00	0.03	0.00	24.30	0.11

The 2026 Tyee test fishery daily and cumulative Sockeye escapement estimate data, along with 2026 daily and cumulative escapement indices by species, are available here:

<http://www.pac.dfo-mpo.gc.ca/fm-gp/northcoast-cotenord/skeenatyee-eng.html>

Kitwanga Weir:

The Gitanyow Fisheries Authority will be operating the Kitwanga Weir again this year. It is typically operational by early July. Updates provided by the Gitanyow Fisheries Authority will be available here: www.gitanyowfisheries.com

Sustut Weir:

The Province of BC will be operating the Sustut Weir this year. It is expected to be operational by August.

Kispiox River:

Water conditions in the Kispiox River, reflective of Drought Management considerations, will be communicated throughout the season.

Area 6**Net Fisheries:***Area A*

Opportunities will be determined in-season and any available information will be provided in future updates.

CSAF Demonstration Fisheries

One CSAF demonstration fishery targeting Area 6 Pink salmon was included in the 2026 draft IFMP. Implementation of this fishery is subject to approval of the final fishing plan.

Areas 7 to 10 - Central Coast

Net Fisheries:

There have been four Chinook-directed commercial gill net fisheries in Area 8 to date this season. The 24-hour openings were held on June 1, 8, 15 and 22. Preliminary catch estimates are provided below.

Fishery Operations System

Commercial SALMON GILL NET In-Season Estimated Catch-by-Area (Pieces) for Area C (Central) and for Period 01-Apr-2026 to 29-Jun-2026

Management Area 8

Notes:

1. Consult the applicable Fishery Manager or Biologist as to the status of particular catch estimates.

Printed from the Fishery Operations System on June 29, 2026 at 14:04

Central Coast Recreational Fisheries:

Data will be provided when available later in the season.

The Heiltsuk, Kitasoo Xai'xais, Nuxalk, and Wuikinuxv Nations, with the coordination of the Central Coast Indigenous Resource Alliance (CCIRA) continue to collect data through a creel survey and DNA sampling program. The program will assess recreational and First Nations' Food, Social, and Ceremonial (FSC) fisheries in marine portions of Areas 6 to 9. Survey work will occur through September 2026. Recreational and Indigenous fishers should be aware that they may be approached by creel surveyors from the Nations to collect important data from these fisheries.
