

**North Coast Salmon Update #5 – 28 July 2026**

Please note that catch numbers and estimates are preliminary and are subject to review.

The 2026/27 Northern Salmon IFMP is available here: [Northern IFMP](#)

North Coast Troll*Coho and Pink Salmon*

The Area F troll, A-B Line (North Dixon Entrance), opening ([FN0589](#)) started on July 1st with retention of Pink, Coho and Sockeye salmon. Northern Sockeye bycatch provisions are in effect, allowing retention of Sockeye east of 133 degrees W longitude. There are currently 23 vessels hailed into this opening and total effort to July 25th is estimated to be 341 vessel-days. Weekly estimates of effort, catch and releases are summarized in the following table.

Table 1. Area F Troll – 2026 Estimated weekly catch and release by species

WEEK	End		Chinook		Coho		Pink		Sockeye		Chum	
	Date	Effort	Kept	Rel.	Kept	Rel.	Kept	Rel.	Kept	Rel.	Kept	Rel.
27	4-Jul	19	0	68	1,343	0	250	0	1	0	0	10
28	11-Jul	59	0	361	5,245	0	1,644	0	9	0	0	42
29	18-Jul	122	0	566	6,979	10	4,025	5	21	0	0	48
30	25-Jul	141	0	649	5,872	8	8,525	6	29	0	0	71
Total		341	0	1,643	19,438	18	14,444	11	60	0	0	172

Notes: -Effort reported as vessel-days.

Chinook Salmon

The Area F Chinook Salmon ITQ and Haida Community Based Fishery (CBF) openings are scheduled to start on August 10th with open areas that include portions of PFMA's 1, 101, 2W and 142. Approximately 90 vessels are expected to participate in the full fleet Chinook opening, which closes on September 30. Retention of Coho and Pink salmon will be permitted in this opening and dockside validation of all Chinook landings is mandatory.

Based on the preseason abundance index of 1.36, the total NBC AABM Chinook TAC for 2026 was set at 164,600 and the preliminary recreational catch forecast is estimated at 35,100 leaving a preliminary Area F TAC of 129,500. This TAC equates to an individual transferrable quota of 762 based on 170 licences remaining.

The Haida CBF opening also includes dual fishing for FSC with mandatory validation of all landings. Area F Chinook and Coho catches are also sampled for CWT recovery and DNA is collected from Chinook and Coho for GSI analysis.

Areas 1 & 2 - Haida Gwaii**Recreational:**

Area 1 and 2 recreational catch estimates for June were derived from two data sources, including logbook catch reports from participating fly-in lodges as well as independent estimates of catch and releases generated by the Haida Fisheries creel program, which included 1173 point-of-access interviews recorded at 8 sites. Interview data are used to generate CPUE and fishery activity patterns. Effort estimates are derived from both roving vessel counts and point of access video. Preliminary recreational catch estimates for June are shown in the following table:

Table 2. Preliminary Recreational Catch Estimates, Haida Gwaii

2026 Preliminary estimates of June recreational fishing catch for Haida Gwaii (Areas 1 and 2)

Area	Effort (Boat trips)	Coho	Coho-Rel	Chinook	Chinook-Rel	Pink	Sockeye	Chum	Halibut	Lingcod	Rockfish
1	3,685	2,224	246	4,233	8,292	35	7	271	2,168	2,218	1,214
2E	-	-	-	-	-	-	-	-	-	-	-
2W	589	68	0	1,046	1,515	0	0	7	464	1,456	630
June Total	4,274	2,292	246	5,279	9,807	35	7	278	2,632	3,674	1,844

Note: Catch estimates are preliminary and subject to revision.

Area 1 and 2 recreational catch estimates for July should be available by the second weekly update in August.

North Coast Chinook Management Plan-AABM Recreational Fisheries

Areas 1, 2, 142, and that portion of Area 101 west of 131 degrees 40.0 minutes West longitude:

- May 29, 2026 to July 31, 2026 - one (1) Chinook per day.
- August 1, 2026 to March 31, 2027 - two (2) Chinook per day.

Area 3 - Nass River

The Nass River Gitwinksihlkw fish wheels have been operating since June 1. In-season run size estimates past the fishwheels are shown in Table 3. The current in-season Sockeye Total Return to Canada (TRTC) forecast is a point estimate of 436,000k, compared to the 1994-2025 mean of 600,000. The current in-season Chinook TRTC forecast is a point estimate of 18,500, compared to the 1994-2025 mean of 30,000.

Table 3. Nass fishwheel in-season run size estimate to July 26, 2026, and historical average cumulative catch (1994-2025) to date.

Year	Sockeye	Chinook	Coho	Steelhead
2026	222,660	9,403	1,065	731
1994-2025 Avg.	193,600	17,960	1,800	560

Data provided by Nisga'a Fisheries and Wildlife Department (NFWD).

Nass River salmon stock assessment updates from the Nisga'a Fish and Wildlife Department are available by Dropbox [here](#).

Printed from the Fishery Operations System on July 21, 2026 at 14:58

CSAF Demonstration and Excess to Salmon Spawning Requirements (ESSR) Fisheries:

Two CSAF Demonstration fisheries targeting Nass Sockeye have been included in the 2026 IFMP. The fishery proponents, the Nisga'a Lisims Government and Gitanyow First Nation, have a combined access to 22.75% of the Canadian Commercial Total Allowable Catch for the Nass.

The CSAF fishery at Meziadin has not been implemented to date.

Two CSAF Demonstration fisheries targeting Area 3 Pink salmon were also included in the 2026 IFMP. North Coast Skeena First Nations Stewardship Society (NCSFNSS), Lax Kw'alaams Band and Metlakatla First Nation have indicated an interest in implementing these fisheries to access 18.63% of harvestable surplus for Area 3 Pink salmon, based on the Area 3 commercial seine harvest. To date these fisheries have not been implemented.

As occurred in 2023 and 2024, ESSR fishing plans that target the harvestable surplus of Meziadin Sockeye are undergoing evaluation for potential implementation in 2026.

Recreational Fisheries:

Non-Tidal

Recreational fishing for Chinook is closed in the Nass River watershed.

North Coast Chinook Management Plan-ISBM Tidal Recreational Fisheries

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2026 at 00:01 hours to 23:59 hours June 22, 2026 - One (1) Chinook per day.
- Effective June 23, 2026 at 00:01 hours to 23:59 hours July 17, 2026 - Zero (0) Chinook per day.
- Effective July 18, 2026 at 00:01 hours to 23:59 hours July 31, 2026 – One (1) Chinook per day.
- Effective Aug 1, 2026 at 00:01 hours to 23:59 hours March 31, 2027 – Two (2) Chinook per day.

Tidal portion of the Gingolx (Kincolith) River:

- Effective June 23, 2026 at 00:01 hours to 23:59 hours March 31, 2027 - Zero (0) Chinook per day.

Sockeye

Recreational fishing for Sockeye will open in Areas 3, 4 and 5 on July 10, 2026 with a daily limit of four (4).

Meziadin Fishway:

Fishway operations commenced July 1 for the 2026 season. As of July 27, a total of 69,529 Sockeye have been counted through, compared to the mean 1994-2025 cumulative count to date of 60,216 (Table 4). Water levels were 1.32m (compared to mean 1998-2025 level of 1.26m), and the water temperature was 15.0°C (16.1°C mean 1999-2025).

Table 4. Cumulative Meziadin fishway counts by species to July 27, 2026, compared to historical mean cumulative adult counts to date.

Year	Sockeye	Chinook	Coho	Steelhead
2026	69,529	23	0	0
1994-2025	60,216	71	0	0
Avg.				

Historic and 2026 counts are available through:

<http://www.pac.dfo-mpo.gc.ca/fm-gp/northcoast-cotenord/meziadin-eng.html>

Kwinageese Weir:

Kwinageese Weir video counting commenced July 20 by NFWD. Counts as of July 26: 0 Sockeye, 34 Chinook, 0 Coho, and 0 Steelhead. Average counts from 2002-2025 compare at 20 Sockeye, 69 Chinook, 0 Coho, and 0 Steelhead.

Alaska Fisheries

District 101 Gillnet Fishery:

The District 101 (D1) gillnet fishery opened for two days in US SW 30. Catch and effort information is available below (Table 5). This fishery opened again for 2 days in SW 31.

Table 5. Alaska District 101 gillnet harvest and effort (CPUE) for stat week 30 in 2026 and the 10-year average.

Species	District 1 Catch – Week 30 (CPUE)	10-Year Average (CPUE)
Chinook	30 (0.5)	84 (0.5)
Sockeye	4,000 (63)	2,686 (17)
Coho	250 (4)	681 (4)
Pink	6,000 (94)	33,789 (213)
Chum	11,000 (172)	36,375 (229)
Effort (boats)	32	39
Fishing Days	2	4

District 104 Seine Fishery:

The District 104 (D4) purse seine fishery opened on Sunday July 19 for 15 hours; catch information is confidential for this opening due to privacy rules (Table 6). This fishery opened again on July 26 for 15 hours; catch information from this opening will be included in the next update.

Table 6. Alaska District 104 seine harvest and effort for start week 30 in 2026.

	Chinook	Sockeye	Coho	Pink	Chum	Boats	Hours
July 19, 2026	CONFIDENTIAL						15

More information on Southeast Alaskan fisheries is available here:

<http://www.adfg.alaska.gov/index.cfm?adfg=fishing.main>

Area 4 - Skeena River

Based on results from the Tyee test fishery to July 27, the current run size estimates range from 1.77 M-3.57 M Skeena sockeye (80% certainty), with a mean (point) estimate of 2.48 M (Table 7, Figure 1). The in-season TRTC estimate has continued to trend downwards and is being monitored carefully to inform fisheries decisions.

Table 7. 2026 in-season run size estimate probability for Skeena Sockeye as of July 27, 2026.

2026 Inseason TRTC								
to July 27				2026 Inseason Run Size Estimate Prob. (TRTC)				
Species	Stock	Escape. Target	TRTC	Median				
Sockeye	Skeena	1,050,000	Mean	10%	25%	50%	75%	90%
			Median	3,570,253	2,968,456	2,483,836	2,055,210	1,773,494

TRTC run size probability distribution to July 27, 2026. Shaded areas indicate 80% CI.

Figure 1. Total return to Canada run size probability distribution to July 27 2026. Shaded areas indicate 80% CI.

Tyee Test Fishery:

The test fishery began operation on June 10, 2026. As of July 27, the estimated number of large Sockeye past Tyee is 1,184,445. Using average run timing (1985-2025), it is estimated that 58.5% of the run has passed Tyee as of this date.

Table 8. Tyee test fishery cumulative index to date July 27, 2026 and ten-year average (2016-2025) to date.

Year	Sockeye	Coho	Pink (even)	Chum	Lg. Chinook	Steelhead
2026	792.94	5.65	69.9	11.33	97.7	59.31
2025	683.73	4	-	5.08	109.78	14.2
2024	937.44	6.14	144.09	2.72	56.55	53.82

CSAF Demonstration and Excess to Salmon Spawning Requirements (ESSR) Fisheries:

Seven CSAF Demonstration fisheries targeting Skeena Sockeye were included in the 2026 draft IFMP. North Coast Skeena First Nations Stewardship Society (NCSFNSS), Kitsumkalum Band, Kitselas First Nation, Metlakatla First Nation, Lax Kw'alaams Band, Gitxsan First Nation, and Lake Babine Nation fisheries represent access to 22.75% of the Canadian Commercial Allowable Catch, further divided by geographic access and proponent.

Area 4 marine Demonstration fisheries were implemented again July 22 and 26; catch information to date is included below (Table 9). Please note catches have been combined to meet privacy requirements. Additional openings will be communicated by fisheries notice.

Table 9. Area 4 CSAF demonstration fishery catches and effort to July 26.

Date	Area	Effort (# of boats)	Sockeye Retained	Pink Retained
8-Jul	4-12 & 4-15	3	129	0
9-Jul	4-9 & 4-12	12	2,227	0
12-Jul	4-12	7	1,326	0
12-Jul	4-5, 4-9, 4-15	6	1,853	0

26-Jul	4-5 & 4-9	5	1,244	0
Total		79	17059	592

In-river Skeena sockeye directed demonstration fisheries began in the lower Skeena River on July 15. Catches from those openings are included below.

Table 10. Skeena River CSAF demonstration fishery catches and effort to July 26.

Date	Area	Sockeye Retained	Pink Retained
15-Jul/16-Jul	Lower Skeena	104	2
18-Jul	Lower Skeena	336	1
19-Jul	Lower Skeena	357	0
21-Jul	Lower Skeena	149	0
22-Jul	Lower Skeena	150	0
23-Jul	Lower Skeena	73	0
24-Jul	Lower Skeena	205	0
25-Jul	Lower Skeena	217	0
26-Jul	Lower Skeena	51	0
Total		1642	3

CSAF demonstration fisheries in the mid-Skeena are expected to begin in the coming weeks.

Two ESSRs in the Skeena River watershed were included in the 2026 draft IFMP: Babine Sockeye (Lake Babine Nation) and Bulkley River Pink salmon (Office of the Wet'suwet'en). Openings of these fisheries will be announced via fisheries notice.

Recreational Fisheries:

Non-Tidal

Recreational fishing for Chinook started closed in the Skeena River watershed and all rivers and lakes flowing into PFMA's 3 to 6, excluding the Kitimat River.

Recreational fishing for Sockeye on the Skeena River mainstem will go to 4 per day on July 29, 2026.

North Coast Chinook Management Plan-ISBM Tidal Recreational Fisheries

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2026 at 00:01 hours to 23:59 hours June 22, 2026 - One (1) Chinook per day.
- Effective June 23, 2026 at 00:01 hours to 23:59 hours July 17, 2026 - Zero (0) Chinook per day.
- Effective July 18, 2026 at 00:01 hours to 23:59 hours July 31, 2026 – One (1) Chinook per day.
- Effective Aug 1, 2026 at 00:01 hours to 23:59 hours March 31, 2027 – Two (2) Chinook per day.

Tidal portion of the Gingolx (Kincolith) River:

- Effective June 23, 2026 at 00:01 hours to 23:59 hours March 31, 2027 - Zero (0) Chinook per day.

Sockeye

Recreational fishing for Sockeye will open in Areas 3, 4 and 5 on July 10, 2026 with a daily limit of four (4).

Area 3 and 4 Creel Survey

June Summary

The North Coast Skeena First Nations Stewardship Society began their creel survey operations in May of 2026. In June of 2026 they performed 436 interviews totalling 1,384 anglers with a reported catch of 489 Chinook and 178 Coho. These numbers are expanded to produce a catch (kept) estimate of 2,757 Chinook and 1,014 Coho.

Kitwanga Weir:

The Gitanyow Fisheries Authority will be operating the Kitwanga Weir. Updates provided by the Gitanyow Fisheries Authority will be available here: www.gitanyowfisheries.com

Sustut Weir:

The Sustut Weir is expected to be operational by August 1 by the Province of BC.

Kispiox River:

Water conditions in the Kispiox River, reflective of Drought Management considerations, will be communicated throughout the season.

Area 6

Net Fisheries:

Area A

Opportunities will be determined in-season and any available information will be provided in future updates.

CSAF Demonstration Fisheries

One CSAF demonstration fishery targeting Area 6 Pink salmon was included in the 2026 draft IFMP. It is not expected that this fishery will proceed this season.

Areas 7 to 10 - Central Coast

Net Fisheries:

There have been five, 24-hour Chinook-directed commercial gill net fisheries in Area 8 to date this season, held on June 1, 8, 15, 22 and 29. Preliminary catch estimates for the Area C gill net fishery are provided below.

The Nuxalk demonstration fishery was opened for 24 hours on July 2, 2026; preliminary catch information is forthcoming. There are no further Chinook-directed commercial gill net openings planned.

Central Coast Recreational Fisheries:

Data will be provided when available later in the season.

As per FN0687; Effective July 10, 2026 at 00:01 hours until 23:59 hours on August 17, 2026. The daily limit for Chinook is zero (0) per day in the tidal waters of Subareas 9-3 to 9-9.

The Heiltsuk, Kitasoo Xai'xais, Nuxalk, and Wuikinuxv Nations, with the coordination of the Central Coast Indigenous Resource Alliance (CCIRA) continue to collect data through a creel survey and DNA sampling program. The program will assess recreational and First Nations' Food, Social, and Ceremonial (FSC) fisheries in marine portions of Areas 6 to 9. Survey work will occur through September 2026. Recreational and Indigenous fishers should be aware that they may be approached by creel surveyors from the Nations to collect important data from these fisheries.
