

**North Coast Salmon Update #9 – 25 Aug 2026***Please note that catch numbers and estimates are preliminary and are subject to review.*The 2026/27 Northern Salmon IFMP is available here: [Northern IFMP](#)**North Coast Troll***Coho and Pink Salmon*

The Area F Chinook Salmon ITQ full fleet opening ([FN0760](#)) and the Haida Community Based Chinook opening ([FN0825](#)) started on August 10th and will continue until September 30th. There are currently 78 vessels participating in the main Chinook opening with retention of Coho and Pink salmon permitted. Validation is mandatory for all Chinook landings.

An additional 5 smaller vessels designated under the Haida CBF troll communal licence have also participated in the Chinook opening. Chinook, Coho and Pinks can be retained for sale and dual fishing for FSC is also permitted, with mandatory validation of all landings.

Weekly estimates of effort, catch and releases to August 22nd are summarized in Table 1 below.

Table 1. 2026 Estimated weekly catch and release by species

Notes: -Effort reported as vessel-days.

Areas 1 & 2 - Haida Gwaii**Recreational:**

Area 1 and 2 (Haida Gwaii) recreational catch estimates (Table 2) are derived from two data sources, including logbook catch reports from the five participating fly-in lodges as well as independent estimates of catch and releases generated by the Haida Fisheries creel program. July creel estimates were based on 1,226 point-of-access interviews recorded at 7 sites. Interview data are used to generate CPUE and fishery activity patterns. Effort estimates are derived from both roving vessel counts and point of access video.

Note: Catch estimates are preliminary and subject to revision.

Terminal Salmon Assessments:

Terminal assessments of dominant cycle Pink Salmon returns (even years on Haida Gwaii) are ongoing, and although returns appear to be approaching targets in most areas, no harvestable surpluses have been identified to date. Monitoring will continue through September and October to assess Chum salmon returns. One vessel-based operator is providing 48 days of charter patrol coverage in Area 2E in 2026. In addition, the Haida Fisheries Program will carry out assessments of key watersheds in Skidegate Inlet, Masset Inlet, Naden Harbour and Rennell Sound.

North Coast Chinook Management Plan-AABM Recreational Fisheries

Areas 1, 2, 142, and that portion of Area 101 west of 131 degrees 40.0 minutes West longitude:

- May 29, 2026 to July 31, 2026 - one (1) Chinook per day.
- August 1, 2026 to March 31, 2027 - two (2) Chinook per day.

Area 3 - Nass River

The Nass River Gitwinksihlkw fish wheels have been operating since June 1. In-season run size estimates past the fishwheels are shown in Table 3. The current in-season Total Return to Canada (TRTC) forecast for Sockeye is a point estimate of 355,000, and for Chinook is a point estimate of 18,000.

Table 3. Nass fishwheel in-season run size estimate to August 20, 2026 and historical average cumulative catch (1994-2025) to date.

Year	Sockeye	Chinook	Coho	Steelhead

CSAF Demonstration and Excess to Salmon Spawning Requirements (ESSR) Fisheries:

Two CSAF Demonstration fisheries targeting Nass Sockeye have been included in the 2026 IFMP. The fishery proponents, the Nisga'a Lisims Government and Gitanyow First Nation, have a combined access to 22.75% of the Canadian Commercial Total Allowable Catch for the Nass.

The Nass CSAF fishery catches to date are included in Table 4. Please note that the Nisga'a demonstration fishery is implemented as part of the Individual Sales fishery and catches are reported separately through NFWD weekly updates.

Table 4. Nass Demonstration Fishery catches to August 24, 2026.

Week End	Area	Sockeye Retained
1-Aug	Meziadin	30
8-Aug	Meziadin	1075
15-Aug	Meziadin	1835
22-Aug	Meziadin	1225
Total		4165

Two CSAF Demonstration fisheries targeting Area 3 Pink salmon will not be implemented in 2026.

As occurred in 2023 and 2024, ESSR fishing plans that target the harvestable surplus of Meziadin Sockeye are undergoing evaluation for potential implementation in 2026.

Recreational Fisheries:

Non-Tidal

Recreational fishing for Chinook is closed in the Nass River watershed.

North Coast Chinook Management Plan-ISBM Tidal Recreational Fisheries

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2026 at 00:01 hours to 23:59 hours June 22, 2026 - One (1) Chinook per day.
- Effective June 23, 2026 at 00:01 hours to 23:59 hours July 17, 2026 - Zero (0) Chinook per day.
- Effective July 18, 2026 at 00:01 hours to 23:59 hours July 31, 2026 – One (1) Chinook per day.
- Effective Aug 1, 2026 at 00:01 hours to 23:59 hours March 31, 2027 – Two (2) Chinook per day.

Tidal portion of the Gingolx (Kincolith) River:

- Effective June 23, 2026 at 00:01 hours to 23:59 hours March 31, 2027 - Zero (0) Chinook per day.

Sockeye

Recreational fishing for Sockeye will move to non-retention in Areas 3, 4 and 5 as of August 28, 2026.

Meziadin Fishway:

Fishway operations commenced July 1 for the 2026 season. As of August 24, a total of 114,572 Sockeye have been counted through, compared to the mean 1994-2025 cumulative count to date of 137,720 (Table 4). Water levels are at 1.15m (compared to mean 1998-2025 level of 1.25m), and the water temperature is 17.0°C (15.4°C mean 1999-2025).

Table 5. Cumulative Meziadin fishway counts by species to August 24, 2026, compared to historical mean cumulative adult counts to date.

Year	Sockeye	Chinook	Coho	Steelhead
2026	114,572	59	555	0
1994-2025 Avg.	137,720	214	294	1

Historic and 2026 counts are available through:

<http://www.pac.dfo-mpo.gc.ca/fm-gp/northcoast-cotenord/meziadin-eng.html>

Kwinageese Weir:

Kwinageese Weir video enumeration commenced July 20 by NFWD. Counts to August 20 indicate 1317 Sockeye, 342 Chinook, 31 Coho, and 2 Steelhead. Average counts from 2002-2025 compare at 2850 Sockeye, 437 Chinook, 30 Coho, and 0 Steelhead.

Alaska Fisheries

District 101 Gillnet Fishery:

The District 101 (D1) gillnet fishery opened again in US SW 34. Catch and effort information is available below (Table 6).

Table 6. Alaska District 101 gillnet harvest and effort (CPUE) for stat week 34 in 2026 and the 10-year average.

Species	District 1 Catch – Week 34 (CPUE)	10-Year Average (CPUE)
Chinook	0	7
Sockeye	300 (4)	970 (9)
Coho	1,400 (19)	1,858 (17)
Pink	28,700 (383)	19,580 (178)
Chum	2,000 (27)	11,278 (103)
Effort (boats)	15	26
Fishing Days	5	4

District 104 Seine Fishery:

The District 104 (D4) purse seine fishery opened again during SW 34 and SW 35 (Table 7).

Table 7. Alaska District 104 seine harvest and effort for start week 34 and 35 in 2026.

Opening	Chinook	Sockeye	Coho	Pink	Chum	Boats	Hours
Aug 18-19	750	4,000	2,500	145,000	6,000	10	39
Aug 22-23	1,150	5,000	5,500	125,000	8,000	12	39

More information on Southeast Alaskan fisheries is available here:

<http://www.adfg.alaska.gov/index.cfm?adfg=fishing.main>

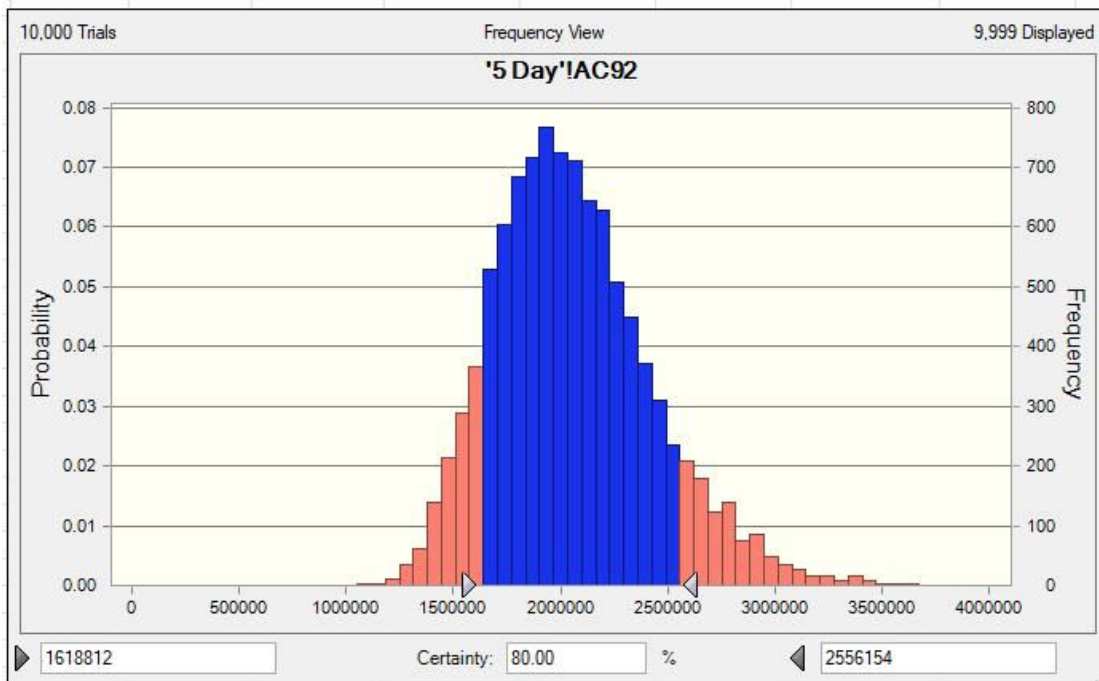

Area 4 - Skeena River

Based on results from the Tyee test fishery to August 24, the current run size estimates range from 1.61M-2.55M Skeena sockeye (80% certainty), with a mean (point) estimate of 2.08M (Table 8, Figure 1).

Table 8. 2026 in-season run size estimate probability for Skeena Sockeye as of August 24, 2026.

2026 Inseason TRTC									
to August 24									
Species	Stock	Escape. Target		2026 Inseason Run Size Estimate Prob. (TRTC)					
			TRTC	Median					
				10%	25%	50%	75%	90%	
Sockeye	Skeena	1,050,000	Mean			2,084,671			
			Median	2,556,154	2,280,450	2,018,850	1,791,868	1,618,812	

TRTC run size probability distribution to August 24, 2026. Shaded areas indicate 80% CI.

Figure 1. Total return to Canada run size probability distribution to August 24, 2026. Shaded areas indicate 80% CI.

Tyee Test Fishery:

The test fishery began operation on June 10, 2026. As of August 24, the estimated number of large Sockeye past Tyee is 1,628,880. Using average run timing (1985-2025), it is estimated that 97.9% of the run has passed Tyee as of this date.

Table 9. Tyee test fishery cumulative index to August 24, 2026 and ten-year average (2016-2025) to date.

Year	Sockeye	Coho	Pink (even)	Chum	Lg. Chinook	Steelhead
2026	1089.94	31.56	576.9	84.34	103.65	171.99
2025	1014.82	26.38	-	23.23	116.62	42.08
2024	1317.54	32.27	796.48	15.32	64.01	133.09
2023	1200.28	93.39	-	47.47	91.33	32.73
2022	2803.22	42.33	441.85	32.66	150.04	59.83
2016-2025 Average	1197.90	42.36	438.66	27.68	92.59	78.44

The 2026 Tyee test fishery daily and cumulative Sockeye escapement estimate data, along with 2026 daily and cumulative escapement indices by species, are available here:

CSAF Demonstration and Excess to Salmon Spawning Requirements (ESSR) Fisheries:

Seven CSAF Demonstration fisheries targeting Skeena Sockeye were included in the 2026 IFMP. North Coast Skeena First Nations Stewardship Society (NCSFNSS), Kitsumkalum Band, Kitselas First Nation, Metlakatla First Nation, Lax Kw'alaams Band, Gitxsan First Nation, and Lake Babine Nation fisheries represent access to 22.75% of the Canadian Commercial Allowable Catch, further divided by geographic access and proponent.

Area 4 marine Demonstration fisheries were closed for the season following the last opening on July 31. Preliminary catch information for the season has been summarized by week and area and included below (Table 10).

Table 10. Area 4 CSAF demonstration fishery catches and effort to August 4.

In-river Skeena sockeye directed demonstration fisheries began in the lower Skeena River on July 15 and closed early last week following a 1 week migration delay from the marine fisheries. Preliminary catch information for the season has been summarized by week in Table 11.

Table 11. Skeena River CSAF demonstration fishery catches and effort.

Week End	Area	Sockeye Retained	Pink Retained
18-Jul	Lower Skeena	400	2
25-Jul	Lower Skeena	1151	1
1-Aug	Lower Skeena	811	0
8-Aug	Lower Skeena	1557	0
15-Aug	Lower Skeena	223	0
Total		4142	3

CSAF demonstration fisheries in the mid-Skeena were opened in the first week of August, with no harvest due to low observed abundance. The demonstration fishery in front of Fulton River on Babine Lake started on Sunday August 23, with a preliminary catch of 2,875 to date.

Two ESSRs in the Skeena River watershed were included in the 2026 IFMP: Babine Sockeye (Lake Babine Nation) and Bulkley River Pink salmon (Office of the Wet'suwet'en).

The Bulkley River Pink salmon fishery began August 7 in Witset Canyon. To date, 823 fish have been harvested.

Recreational Fisheries:

Non-Tidal

Recreational fishing for Chinook started closed in the Skeena River watershed and all rivers and lakes flowing into PFMA's 3 to 6, excluding the Kitimat River.

Recreational fishing for Sockeye on the Skeena River mainstem will close as of August 28, 2026.

Recreational fishing for Sockeye on the Babine River closed Aug 17, 2026. The recreational fishery in Babine Lake will close on August 28, 2026.

Kispiox River closed to Coho and Pink fishing Aug 24, 2026 due to high water temperatures.

North Coast Chinook Management Plan-ISBM Tidal Recreational Fisheries

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2026 at 00:01 hours to 23:59 hours June 22, 2026 - One (1) Chinook per day.

- Effective June 23, 2026 at 00:01 hours to 23:59 hours July 17, 2026 - Zero (0) Chinook per day.
- Effective July 18, 2026 at 00:01 hours to 23:59 hours July 31, 2026 – One (1) Chinook per day.
- Effective Aug 1, 2026 at 00:01 hours to 23:59 hours March 31, 2027 – Two (2) Chinook per day.

Tidal portion of the Gingolx (Kincolith) River:

- Effective June 23, 2026 at 00:01 hours to 23:59 hours March 31, 2027 - Zero (0) Chinook per day.

Sockeye

Recreational fishing for Sockeye will move to non-retention in Areas 3, 4 and 5 as of August 28, 2026.

Area 3 and 4 Creel Survey

July Summary

The North Coast Skeena First Nations Stewardship Society began their creel survey operations in May of 2026. In July of 2026 they performed 697 interviews totalling 2,437 anglers with a reported catch of 424 Chinook, 2,171 Coho, 2 Chum, 335 Pink and 1 Sockeye. These numbers are expanded to produce a catch (kept) estimate of 2,051 Chinook, 13,667 Coho, 6 Chum, 2,588 Pink and 10 Sockeye.

Kitwanga Weir:

Gitanyow Fisheries Authority (GFA) commenced operations of the Kitwanga River Adult Salmon Enumeration Facility on July 21 for the season, later than typical due to high water levels. To August 20, GFA has counted 75 Sockeye, 691 Chinook (additional 144 jack Chinook), 7145 Pink, 240 Chum, and 213 Coho through the weir. Updates provided by the Gitanyow Fisheries Authority are available through: www.gitanyowfisheries.com

Kispiox River:

Water conditions in the Kispiox River, reflective of Drought Management considerations, will be communicated throughout the season.

Area 6

Net Fisheries:

Area A

No opportunities were determined for the 2026 season.

CSAF Demonstration Fisheries

One CSAF demonstration fishery targeting Area 6 Pink salmon was included in the 2026 draft IFMP and did not proceed this season.

Areas 7 to 10 - Central Coast

Net Fisheries:

There have been five, 24-hour Chinook-directed commercial gill net fisheries in Area 8 to date

this season, held on June 1, 8, 15, 22 and 29. Preliminary catch estimates for the Area C gill net fishery are provided below.

Fishery Operations System

**Commercial SALMON GILL NET In-Season Estimated Catch-by-Area (Pieces)
for Area C (Central) and
for Period 01-Apr-2026 to 10-Aug-2026**

Notes:

1. Consult the applicable Fishery Manager or Biologist as to the status of particular catch estimates.

Printed from the Fishery Operations System on August 10, 2026 at 10:14

The Nuxalk demonstration fishery was opened for 24 hours on July 2, 2026; preliminary catch information is forthcoming. There are no further Chinook-directed commercial gill net openings planned.

Central Coast Recreational Fisheries:

As per FN0687; Effective July 10, 2026 at 00:01 hours until 23:59 hours on August 17, 2026. The daily limit for Chinook is zero (0) per day in the tidal waters of Subareas 9-3 to 9-9.

The Heiltsuk, Kitsoo Xai'xais, Nuxalk, and Wuikinuxv Nations, with the coordination of the Central Coast Indigenous Resource Alliance (CCIRA) continue to collect data through a creel survey and DNA sampling program. The program will assess recreational and First Nations' Food, Social, and Ceremonial (FSC) fisheries in marine portions of Areas 6 to 9. Survey work will occur through September 2026. Recreational and Indigenous fishers should be aware that they may be approached by creel surveyors from the Nations to collect important data from these fisheries.
