

North Coast Salmon Update #7 – 11 Aug 2026

Please note that catch numbers and estimates are preliminary and are subject to review.

The 2026/27 Northern Salmon IFMP is available here: [Northern IFMP](#)

North Coast Troll

Coho and Pink Salmon

The Area F Chinook Salmon ITQ full fleet opening ([FN0760](#)) and the Haida Community Based Chinook opening ([FN0825](#)) started on August 10th. There are currently 90 vessels participating in the main opening, which includes portions of PFMA 1, 101, 2W and 142. Retention of Coho and Pink salmon will be permitted in this opening and dockside validation of all Chinook landings is mandatory.

An additional 13 vessels are also designated under the Haida CBF troll communal licence including 2 full sized trollers and 11 smaller restricted gear vessels. The CBF opening also includes dual fishing for FSC with mandatory validation of all landings.

Area F Chinook and Coho catches are also sampled for CWT recovery and DNA is collected from Chinook and Coho for GSI analysis. Weekly estimates of effort, catch and releases to August 8th (North Dixon A-B Line opening) are summarized in Table 1 below.

Table 1. 2026 Estimated weekly catch and release by species

WEEK	End Date	Effort	Chinook		Coho		Pink		Sockeye		Chum	
			Kept	Rel.	Kept	Rel.	Kept	Rel.	Kept	Rel.	Kept	Rel.
27	4-Jul	19	0	56	1,266	0	327	0	1	0	0	8
28	11-Jul	58	0	305	4,992	0	1,832	0	9	0	0	40
29	18-Jul	109	0	426	6,477	13	4,267	5	15	0	0	44
30	25-Jul	119	0	474	5,375	7	7,688	6	16	0	0	51
31	1-Aug	121	0	700	5,138	0	10,155	30	29	3	0	70
32	8-Aug	47	0	211	2,368	0	7,314	100	1	2	0	48
Total			0	2,171	25,617	20	31,583	141	71	5	0	261

Notes: -Effort reported as vessel-days.

Precautionary time restrictions in the Northern Troll, include delaying Chinook salmon retention through July and the first part of August. Non retention in July is primarily aimed at protecting North Coast Chinook, and at-risk Fraser River stream type Chinook, as well as allowing passage of Fraser River not at-risk Chinook for FSC and southern fisheries. Restrictions in the first part of August also help to limit exploitation of WCVI Chinook to a maximum 3.2% exploitation objective. The fishery is expected to continue until September 30th.

Areas 1 & 2 - Haida Gwaii

Recreational:

Area 1 and 2 (Haida Gwaii) recreational catch estimates (Table 2) are derived from two data sources, including logbook catch reports from the five participating fly-in lodges as well as independent estimates of catch and releases generated by the Haida Fisheries creel program. July creel estimates were based on 1,226 point-of-access interviews recorded at 7 sites. Interview data are used to generate CPUE and fishery activity patterns. Effort estimates are derived from both roving vessel counts and point of access video.

Table 2. Preliminary Recreational Catch Estimates, Haida Gwaii

2026 Preliminary estimates of recreational fishing catch for Haida Gwaii (Areas 1 and 2W)

Month	Area	Effort (Boat trips)	Coho	Coho-Rel	Chinook	Chinook-Rel	Pink	Sockeye	Chum	Halibut	Lingcod	Rockfish
June	1	3,596	2,261	246	4,064	8,292	35	11	302	2,123	2,415	1,100

Note: Catch estimates are preliminary and subject to revision.

Terminal Salmon Assessments:

Terminal salmon assessments will start in later this week to assess dominant cycle Pink salmon returns (even years on Haida Gwaii) and the monitoring will continue through September and October to also assess Chum salmon returns. One vessel-based operator will provide 48 days of charter patrol coverage in Area 2E in 2026. In addition, the Haida Fisheries Program will carry out assessments of key watersheds in Skidegate Inlet, Masset Inlet, Naden Harbour and Rennell Sound starting in mid-August.

The Haida Fisheries program is also operating the Yakoun River ARIS sonar through the summer to monitor Chinook and Pink Salmon passage. Plans are also in place to install the Tlell River counting fence (Tlell Watershed Society) in mid-August for video-based monitoring of Coho and Pink salmon escapement.

North Coast Chinook Management Plan-AABM Recreational Fisheries

Areas 1, 2, 142, and that portion of Area 101 west of 131 degrees 40.0 minutes West longitude:

- May 29, 2026 to July 31, 2026 - one (1) Chinook per day.

August 1, 2026 to March 31, 2027 - two (2) Chinook per day.

Area 3 - Nass River

The Nass River Gitwinksihlkw fish wheels have been operating since June 1. In-season run size estimates past the fishwheels are shown in Table 3. The current in-season Total Return to Canada (TRTC) forecast for Sockeye is a point estimate of 376,000k, and for Chinook is a point

estimate of 18,000.

Table 3. Nass fishwheel in-season run size estimate to August , 2026 and historical average cumulative catch (1994-2025) to date.

Year	Sockeye	Chinook	Coho	Steelhead
2026	237,997	9,508	16,519	2,463
1994-2025 Avg.	264,300	18,490	23,500	3,200

Data provided by Nisga'a Fisheries and Wildlife Department (NFWD).

Nass River salmon stock assessment updates from the Nisga'a Fish and Wildlife Department are available by Dropbox [here](#).

CSAF Demonstration and Excess to Salmon Spawning Requirements (ESSR) Fisheries:

Two CSAF Demonstration fisheries targeting Nass Sockeye have been included in the 2026 IFMP. The fishery proponents, the Nisga'a Lisims Government and Gitanyow First Nation, have a combined access to 22.75% of the Canadian Commercial Total Allowable Catch for the Nass.

The Nass CSAF fishery catches to date are included in Table 4. Please note that the Nisga'a demonstration fishery is implemented as part of the Individual Sales fishery and catches are reported separately through NFWD weekly updates.

Table 4. Nass Demonstration Fishery catches to August 8, 2026.

Week End	Area	Sockeye Retained
1-Aug	Meziadin	30
8-Aug	Meziadin	1075
Total		1105

Two CSAF Demonstration fisheries targeting Area 3 Pink salmon were also included in the 2026 IFMP. North Coast Skeena First Nations Stewardship Society (NCSFNSS), Lax Kw'alaams Band and Metlakatla First Nation have indicated an interest in implementing these fisheries to access 18.63% of harvestable surplus for Area 3 Pink salmon, based on the Area 3 commercial seine harvest. To date these fisheries have not been implemented.

As occurred in 2023 and 2024, ESSR fishing plans that target the harvestable surplus of Meziadin Sockeye are undergoing evaluation for potential implementation in 2026.

Recreational Fisheries:*Non-Tidal*

Recreational fishing for Chinook is closed in the Nass River watershed.

North Coast Chinook Management Plan-ISBM Tidal Recreational Fisheries

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2026 at 00:01 hours to 23:59 hours June 22, 2026 - One (1) Chinook per day.
- Effective June 23, 2026 at 00:01 hours to 23:59 hours July 17, 2026 - Zero (0) Chinook per day.
- Effective July 18, 2026 at 00:01 hours to 23:59 hours July 31, 2026 – One (1) Chinook per day.
- Effective Aug 1, 2026 at 00:01 hours to 23:59 hours March 31, 2027 – Two (2) Chinook per day.

Tidal portion of the Gingolx (Kincolith) River:

- Effective June 23, 2026 at 00:01 hours to 23:59 hours March 31, 2027 - Zero (0) Chinook per day.

Sockeye

Recreational fishing for Sockeye will open in Areas 3, 4 and 5 on July 10, 2026 with a daily limit of four (4).

Meziadin Fishway:

Fishway operations commenced July 1 for the 2026 season. As of August 10, a total of 91,722 Sockeye have been counted through, compared to the mean 1994-2025 cumulative count to date of 96,131 (Table 4). Water levels are at 1.19m (compared to mean 1998-2025 level of 1.24m), and the water temperature is 17.5°C (17.0°C mean 1999-2025).

Table 5. Cumulative Meziadin fishway counts by species to August 10, 2026, compared to historical mean cumulative adult counts to date.

Year	Sockeye	Chinook	Coho	Steelhead
2026	91,722	41	4	0
1994-2025 Avg.	96,131	158	11	0

Historic and 2026 counts are available through:

<http://www.pac.dfo-mpo.gc.ca/fm-gp/northcoast-cotenord/meziadin-eng.html>

Kwinageese Weir:

Kwinageese Weir video enumeration commenced July 20 by NFWD. Counts to August 9 indicate 444 Sockeye, 236 Chinook, 4 Coho, and 0 Steelhead. Average counts from 2002-2025 compare at 980 Sockeye, 280 Chinook, 0 Coho, and 0 Steelhead.

Alaska Fisheries

District 101 Gillnet Fishery:

The District 101 (D1) gillnet fishery opened for two days in US SW 32. Catch and effort information is available below (Table 6).

Table 6. Alaska District 101 gillnet harvest and effort (CPUE) for stat week 32 in 2026 and the 10-year average.

Species	District 1 Catch – Week 32 (CPUE)	10-Year Average (CPUE)
Chinook	20 (0)	24 (1)
Sockeye	2,800 (28)	1,901 (12)
Coho	2,200 (22)	1,332 (9)
Pink	29,500 (295)	33,594 (219)
Chum	9,500 (250)	16,722 (109)
Effort (boats)	20	33
Fishing Days	5	5

District 104 Seine Fishery:

The District 104 (D4) purse seine fishery opened on Sunday August 2 for 15 hours and again on August 6-7 for 39 hours (Table 7).

Table 7. Alaska District 104 seine harvest and effort for start week 32 in 2026.

Opening	Chinook	Sockeye	Coho	Pink	Chum	Boats	Hours
Aug 2	500	4,400	4,200	263,000	25,000	25	15
Aug 6-7	400	3,400	3,000	485,000	21,500	20	39

More information on Southeast Alaskan fisheries is available here:

<http://www.adfg.alaska.gov/index.cfm?adfg=fishing.main>

Area 4 - Skeena River

Based on results from the Tyee test fishery to August 10, the current run size estimates range from 1.71M-2.80M Skeena sockeye (80% certainty), with a mean (point) estimate of 2.19M (Table 8, Figure 1).

Table 8. 2026 in-season run size estimate probability for Skeena Sockeye as of August 10, 2026.

Figure 1. Total return to Canada run size probability distribution to August 10, 2026. Shaded areas indicate 80% CI.

Tyee Test Fishery:

The test fishery began operation on June 10, 2026. As of August 10, the estimated number of large Sockeye past Tyee is 1,586,978. Using average run timing (1985-2025), it is estimated that 88.3% of the run has passed Tyee as of this date.

Table 9. Tyee test fishery cumulative index to August 10, 2026 and ten-year average (2016-2025) to date.

Year	Sockeye	Coho	Pink (even)	Chum	Lg. Chinook	Steelhead
2026	1061.94	21.16	442.52	47.07	103.16	140.27
2025	930.34	16.68	-	16.39	114.48	28.47
2024	1278.51	21.67	535.18	9.14	63.82	110.36
2023	1074.9	38.5	-	14.76	89.83	17.99

2022	2488.71	28.13	333	13.37	149.45	46.45
2016-2025 Average	1078.86	25.86	301.23	14.07	91.16	62.22

The 2026 Tyee test fishery daily and cumulative Sockeye escapement estimate data, along with 2026 daily and cumulative escapement indices by species, are available here:

<http://www.pac.dfo-mpo.gc.ca/fm-gp/northcoast-cotenord/skeenatyee-eng.html>

CSAF Demonstration and Excess to Salmon Spawning Requirements (ESSR) Fisheries:

Seven CSAF Demonstration fisheries targeting Skeena Sockeye were included in the 2026 draft IFMP. North Coast Skeena First Nations Stewardship Society (NCSFNSS), Kitsumkalum Band, Kitselas First Nation, Metlakatla First Nation, Lax Kw'alaams Band, Gitxsan First Nation, and Lake Babine Nation fisheries represent access to 22.75% of the Canadian Commercial Allowable Catch, further divided by geographic access and proponent.

Area 4 marine Demonstration fisheries were closed for the season following the last opening on July 31. Preliminary catch information for the season has been summarized by week and area and included below (Table 10).

Table 10. Area 4 CSAF demonstration fishery catches and effort to August 4.

Week End	Area	Effort (# of boats)	Sockeye Retained	Pink Retained
11-Jul	4-9, 4-12, 4-15	15	2356	0
18-Jul	4-5 & 4-9	5	1926	0
18-Jul	4-12	20	3231	0
18-Jul	4-15	10	2076	0
25-Jul	4-5, 4-12, 4-15	12	3619	577
1-Aug	4-5 & 4-9	7	1588	0
1-Aug	4-12	15	3251	92
1-Aug	4-15	7	2018	0
Total		91	20065	669

In-river Skeena sockeye directed demonstration fisheries began in the lower Skeena River on July 15 and closed early this week following a 1 week migration delay from the marine fisheries. Preliminary catch information for the season has been summarized by week in Table 11.

Table 11. Skeena River CSAF demonstration fishery catches and effort. Note: catches to August 15 are preliminary.

Week End	Area	Sockeye Retained	Pink Retained
18-Jul	Lower Skeena	400	2
25-Jul	Lower Skeena	1151	1
1-Aug	Lower Skeena	811	0
8-Aug	Lower Skeena	1557	0
15-Aug	Lower Skeena	223	0
Total		4142	3

CSAF demonstration fisheries in the mid-Skeena began last week. Catch information will be included in the next weekly update.

Two ESSRs in the Skeena River watershed were included in the 2026 draft IFMP: Babine Sockeye (Lake Babine Nation) and Bulkley River Pink salmon (Office of the Wet'suwet'en).

The Bulkley River Pink salmon fishery began late last week in Witset Canyon. Catch information from this fishery will be shared in the next weekly update.

Recreational Fisheries:

Non-Tidal

Recreational fishing for Chinook started closed in the Skeena River watershed and all rivers and lakes flowing into PFMA's 3 to 6, excluding the Kitimat River.

Recreational fishing for Sockeye on the Skeena River mainstem increased to 4 per day on July 29, 2026.

Recreational fishing for Sockeye on the Babine River and lake opened to 2 per day on Aug 1, 2026.

North Coast Chinook Management Plan-ISBM Tidal Recreational Fisheries

Areas 3 to 5, 103 to 105, Subarea 102-1, and that portion of Area 101 east of 131 degrees 40.0 minutes West longitude:

- Effective June 1, 2026 at 00:01 hours to 23:59 hours June 22, 2026 - One (1) Chinook per day.
- Effective June 23, 2026 at 00:01 hours to 23:59 hours July 17, 2026 - Zero (0) Chinook per day.
- Effective July 18, 2026 at 00:01 hours to 23:59 hours July 31, 2026 – One (1) Chinook per day.
- Effective Aug 1, 2026 at 00:01 hours to 23:59 hours March 31, 2027 – Two (2) Chinook per day.

Tidal portion of the Gingolx (Kincolith) River:

- Effective June 23, 2026 at 00:01 hours to 23:59 hours March 31, 2027 - Zero (0) Chinook per day.

Sockeye

Recreational fishing for Sockeye will open in Areas 3, 4 and 5 on July 10, 2026 with a daily limit of four (4).

Area 3 and 4 Creel Survey

June Summary

The North Coast Skeena First Nations Stewardship Society began their creel survey operations in May of 2026. In June of 2026 they performed 436 interviews totalling 1,384 anglers with a reported catch of 489 Chinook and 178 Coho. These numbers are expanded to produce a catch (kept) estimate of 2,757 Chinook and 1,014 Coho.

Kitwanga Weir:

Gitanyow Fisheries Authority (GFA) commenced operations of the Kitwanga River Adult Salmon Enumeration Facility on July 21 for the season, later than typical due to high water levels. To August 6, GFA has counted 4 Sockeye, 208 Chinook, 6 Pink, 2 Chum, and 1 Coho through the weir. Updates provided by the Gitanyow Fisheries Authority are available through: www.gitanyowfisheries.com

Sustut Weir:

The Upper Sustut River Weir became operational August 1 by the Province of BC. No data has been made available.

Kispiox River:

Water conditions in the Kispiox River, reflective of Drought Management considerations, will be communicated throughout the season.

Area 6

Net Fisheries:

Area A

No opportunities have been determined for the 2026 season.

CSAF Demonstration Fisheries

One CSAF demonstration fishery targeting Area 6 Pink salmon was included in the 2026 draft IFMP. It is not expected that this fishery will proceed this season.

Areas 7 to 10 - Central Coast

Net Fisheries:

There have been five, 24-hour Chinook-directed commercial gill net fisheries in Area 8 to date this season, held on June 1, 8, 15, 22 and 29. Preliminary catch estimates for the Area C gill net fishery are provided below.

The Nuxalk demonstration fishery was opened for 24 hours on July 2, 2026; preliminary catch information is forthcoming. There are no further Chinook-directed commercial gill net openings planned.

Notes:

1. Consult the applicable Fishery Manager or Biologist as to the status of particular catch estimates.

Printed from the Fishery Operations System on August 10, 2026 at 10:14

Central Coast Recreational Fisheries:

As per FN0687; Effective July 10, 2026 at 00:01 hours until 23:59 hours on August 17, 2026. The daily limit for Chinook is zero (0) per day in the tidal waters of Subareas 9-3 to 9-9.

The Heiltsuk, Kitasoo Xai'xais, Nuxalk, and Wuikinuxv Nations, with the coordination of the Central Coast Indigenous Resource Alliance (CCIRA) continue to collect data through a creel survey and DNA sampling program. The program will assess recreational and First Nations' Food, Social, and Ceremonial (FSC) fisheries in marine portions of Areas 6 to 9. Survey work will occur through September 2026. Recreational and Indigenous fishers should be aware that they may be approached by creel surveyors from the Nations to collect important data from these fisheries.
